

VCare Nursing

Platform Feature Guide

What clients can do · What care staff can do

Overview

VCare Nursing is a website that connects families and organisations in Sri Lanka with verified home-care professionals: nurses, nursing assistants, caretakers, nannies, physiotherapists and counsellors. Clients find and book care online and manage everything in one account. Care staff apply, get verified, see their assignments and track their pay in their own portal.

Clients	Anyone booking care for themselves or a family member (an individual) or a company arranging care. Clients can also browse the site without an account.
Care staff	Nurses, caretakers, nannies and other professionals placed with clients. They use a separate 'Provider Portal' after they are approved.
Behind the scenes	The VCare office team runs an admin dashboard: verifying staff, matching caregivers, invoicing and paying staff. This guide covers only what clients and staff themselves see.

The three ways clients can request care

Live-in	The caregiver lives at the client's home and covers full days.
Shift-based	The caregiver works set shifts (for example days or nights).
Visit	Shorter, scheduled visits rather than a full shift.

Care services offered

Home Nursing · Elderly Care · Child / Baby Care · Hospital Staffing (for hospitals and care facilities). Home Nursing, Elderly Care and Child Care each have an information page and an online booking form. Hospital Staffing is an information page describing partnership models for facilities.

Part 1 · What a client can do

Everything a family or company can do on the website and in their client account.

1 Discover VCare (no account needed)

Browse services

Public pages explain Home Nursing, Elderly Care, Child Care and Hospital Staffing, with a landing page, an About page and customer reviews.

Browse and search caregivers

A public directory of available staff that can be searched by name, role or location, with role filters.

View a caregiver's full profile

Each profile shows a photo, specialty, location, qualifications, languages spoken, introduction videos and ratings. Trust badges show Identity Verified, Certifications Checked and Background Cleared. A live status shows whether the caregiver is Available now, On shift or Off duty.

Product catalogue

A shop-style page with three tabs: **For Sale** (medical and care products), **Rentals** (equipment hire) and **Services**. It has search and a detail page for each item.

2 Create and secure an account

Register as an individual or a company

Sign up with name, contact details, address and city, plus a company name for corporate clients.

Phone verification

A one-time code is sent by SMS to confirm the mobile number before the account is active.

Client profile

After registering, the client completes their profile. They can later see their own details, additional phone numbers and account status.

Sign in and password recovery

Login, plus a 'forgot password' flow that uses an SMS code to reset the password.

Registration fee and membership status

The profile clearly shows whether the registration fee is pending (default LKR 10,000), waived, receipt submitted, paid, or whether membership has expired, and reminds the client what action is needed.

3 Request and manage care

Care Profiles (patients)

Clients keep a profile for each person receiving care: name, age and gender, medical condition, home address, special remarks and emergency contacts. Profiles can be added, viewed, searched and deleted, and are reused for every booking.

Book care online

A guided form for Home Nursing, Elderly Care or Baby Care. The client picks the care profile, the service model (Live-in, Shift-based or Visit), the address and any special requirements, and enters the payer's details. For live-in care they can filter by staff who are willing to live in.

Choose a caregiver

The client can browse and choose a preferred caregiver (with a gender filter), so families who care about this can pick the person themselves.

Booking confirmation

A confirmation page appears immediately after the request is submitted.

Track requests and quotations

'Service Requests' shows every request with its progress (for example New Lead, Pending, Assigned, Confirmed, Completed) in a list or a timeline. It also lists the quotations the VCare team has prepared, with the daily rate, transport fee, registration fee, duration and totals, and any payment slips the client has uploaded.

My Bookings

All bookings in one place, split into Active, Completed, Cancelled, Pending Termination and Terminated. Each booking shows the service, dates and start time, and the assigned caregiver's name and contact details.

Request to end a booking

If care is no longer needed, the client submits a termination request with the reason, the date they want it to end and an urgency level. The VCare team reviews it, and its status stays visible.

4

Pay and keep track of money

Financial overview

A summary of total invoiced, total paid, balance due and wallet balance, with a clear list of any overdue payments.

Transaction history

Every invoice, payment and wallet refund in one list, filterable by category, method (bank transfer, online, wallet) and status (completed, pending, failed).

Upload payment proof by secure link

For bank-transfer payments the client receives a private link and can upload the bank receipt from any phone, without logging in. The office then confirms it.

Wallet

Any credit held for the client (for example a refund) sits in a wallet balance that is shown in their account.

5

Feedback and products

Rate and review caregivers

Clients can leave a star rating and written review for a caregiver they have worked with, either right from a booking or from the 'My Reviews' page. Reviews feed the caregiver's public rating.

My Reviews

See all reviews written, with counts such as total reviews and the most reviewed staff member.

Purchased items and rentals

A 'Products' page lists what the client has bought or rented, with invoice status and deposit details. For rentals it shows the return date, or the next invoice date for recurring rentals, and the return or cancelled status.

Good to know for messaging: some steps are completed by the VCare office rather than by the client on screen, namely approving quotations, matching caregivers, confirming payments and approving termination requests. The client sees the result and progress of each step in their account.

Part 2 · What a staff member can do

Everything a nurse, caretaker, nanny or other professional can do, from applying to getting paid.

1 Join VCare

Recruitment page

A public 'Join the Team' page explains who VCare is looking for (registered nurses, child care professionals, elderly care aides), the benefits and the four-step application process.

Apply online

A multi-step application collects personal details, city, NIC number with front and back photos, a profile picture, the roles applied for (Professional Nurse, Nursing Assistant, Caretaker, Nanny, Physiotherapist, Counsellor) and a description of qualifications.

Phone verification

The applicant confirms their mobile number with an SMS code before the application is submitted.

Upload compliance documents

Applicants receive a private link to upload the Grama Niladhari Report and the Police Report (JPG, PNG or PDF). They can return to the link at any time and replace a file.

Verification by the VCare team

The office reviews the application. The applicant's status appears as Pending or Verified in their portal.

2 Daily use of the Provider Portal

Dashboard

A personal home screen showing a greeting, verification status, wallet balance, number of completed shifts, average rating and active shifts. It also shows whether required documents are uploaded.

Availability switch

Staff mark themselves 'Available for shifts' or 'Unavailable' with one tap. When available they are visible to coordinators for new assignments, and the status also shows on their public profile.

My Assignments

A list of every current and past assignment with status (Active, Pending Termination, Terminated, Completed, Cancelled). Each card shows the care profile (age, gender, medical condition), client contact and emergency contact, service location, start date and time, daily rate, overtime rate, duration and special remarks. If the client has asked to end the booking, staff see a notice with the requested end date.

Care calendar

A visual timeline of the assignment with the days worked, so staff can see their attendance record.

My Profile

A read-only view of their own profile as clients see it: photo, professional summary, documents and certifications, contact details and verification status.

Earnings summary

Cards show Current Balance (earned but not yet paid), Total Earned, Total Paid Out and Wallet Balance.

Earnings and payouts ledger

A dated, paged history of every daily salary credit, advance, deduction and payout, with a running balance after each line so staff can see exactly how the figure was reached.

Request a salary advance

Staff can request an advance from their wallet, subject to a minimum balance that is shown to them. They can follow each request as Pending, Approved or Rejected, with the date it was actioned.

Request Leave

Pick a start and end date, see the number of days covered, add an optional reason, and submit. The list of past requests shows Pending, Approved or Rejected, with the reason if rejected.

Request a Change

Staff cannot edit sensitive details directly. They submit a request and the office approves it. Options: **update profile details** (name, address, city, gender, date of birth, live-in willingness, qualifications, NIC), or **add, edit or remove a bank account** used for salary payments. Each request can be tracked as Pending, Under Review, Approved or Rejected.

Good to know for messaging: the office can switch off a staff member's portal access at any time. Those staff are redirected to a dedicated 'access revoked' page.

At a glance

Area	Client	Staff
Sign-up	Individual or company account, SMS verification	Online application, SMS verification, document upload
Profile	Own details, phone numbers, care profiles for patients	Professional profile, public page shown to clients
Core activity	Book care, choose caregiver, track requests, end bookings	View assignments, set availability, care calendar
Money	Invoices, payments, wallet, overdue list, receipt upload	Earnings ledger, wallet, advance requests
Requests	Termination request, quotation follow-up	Leave request, profile and bank change request
Feedback	Rate and review caregivers	Ratings received show on dashboard and public profile
Extras	Product purchases and equipment rentals	Verification badges shown to clients

Before publishing claims

Some figures and promises on the current public pages are marketing copy, not features of the software, and should be confirmed with the client before they appear in campaigns. Examples: "2,500+ professionals joined", "weekly payouts", "free training modules and mentorship", "skill assessment", and "uniform and ID on onboarding" on the Join the Team page. The registration fee of LKR 10,000 is a default and can be changed or waived per client.
